Market Outlook:

Headwinds from the global economy will continue to impact domestic growth in the coming quarters. The downwards risks to growth in 2012-13 are likely to persist, if the monsoon is below the long term average. The index of industrial production numbers in the recent months have not been encouraging and the pace has slowed down. Notwithstanding the recent moderation in global crude oil prices and the domestic price pressures in manufactured products, the upside risk to inflation remains. While the moderation in global commodity prices could aid in checking inflationary trends in the near future, this could to an extent be offset by weakness in the exchange rate.

The headline inflation has remained high over 7% even though the core inflation has come under control. The Reserve Bank of India has formally announced an end to rate hike cycle. While the repo rate has been cut by 50 bps in April, extent and pace of further policy easing will be determined by the inflationary conditions.

A combination of uncertain international environment and slowing domestic growth poses challenges to equity market performance in the near term. The market expectations are low and valuations currently are cheaper than the long term average. Any change in the sentiment could lead to a positive shift in equity markets.

The macro economic factors will have bearing on the growth and direction of the Mutual Fund Industry. The government too is contemplating certain measures that may have a positive impact and put the Mutual Fund industry on a sustained growth path. The industry is also taking certain measures to bring standardization and convenience to the investors and distributors

Investors should continue to get guided by appropriate asset allocation to minimize risks and build a strong portfolio of investments for realizing their investment objectives.
