Investments by NRIs / FIIs Investments by NRIs/ FIIs are allowed on a full repatriation basis subject to RBI approvals, if any. However, the sale and solicitation of Units of the Fund is prohibited to citizens and residents of United States of America or any other jurisdiction which restricts or regulates the sale of Indian securities to its citizens and or residents or which jurisdiction could otherwise subject the AMC or its parent companies or any of its affiliates or employees or the trustees to any reporting, licensing or registration requirements, in such jurisdiction.

Neither this SID nor the units have been registered in any jurisdiction. The distribution of this SID in certain jurisdictions may be restricted or subject to registration requirements and, accordingly, persons who come into possession of this SID in such jurisdictions are required to inform themselves about, and to observe, any such restrictions. No person receiving a copy of this SID or any accompanying application form in such jurisdiction may treat this SID or such application form as constituting an invitation to them to subscribe for Units, nor should they in any event use any such application form, unless in the relevant jurisdiction such an invitation could lawfully be made to them and such application form could lawfully be used without compliance with any registration or other legal requirements.

Transfer The Units of the Schemes held by way of account statement are not transferable.

The units held in dematerialized form are transferable in accordance with the provisions of SEBI (Depositories and Participants) Regulations, as may be amended from time to time.

Transfer would be only in favor of transferees who are capable of holding units. The Fund will not be bound to recognize any other transfer. The delivery instructions for transfer of units will have to be lodged with the DP in requisite form as may be required from time to time and transfer will be effected in accordance with such rules/regulations as may be in force governing transfer of securities in dematerialized mode.

Transparency The first NAV shall be announced within 5 working days from the date of allotment. The NAV of the Scheme thereafter will be calculated and declared on every business day on the AMFI website www.amfiindia.com and the Fund's website www.dws-india.com. The NAV shall also be announced on the next Business Day in two news paper whereas the complete portfolio shall be published in 2 Newspapers on a half yearly basis.

Liquidity No redemption/repurchase of units shall be allowed prior to the maturity of the Scheme. Investors wishing to exit may do so through stock exchange mode.

Unit holders are informed that the trading in units on the stock exchange(s) shall be suspended up to two working days prior to the record date for the purpose of dividend declaration.

Duration of the Scheme The Scheme will be for a duration of 3 years from the date of allotment and the Scheme will be fully redeemed / wound up at the end of the period. In case the Maturity date or payout date happens to be a non business day then the applicable NAV for redemptions and switch out shall be calculated immediately

on the next business day.

However, the Scheme may be liquidated any time prior to the expiration, under the following circumstances:

- On the happening of any event which, in the opinion of the trustees requires the Scheme to be wound up.
 - If seventy five per cent of the Unitholders pass a resolution that the Scheme be wound up.
 - If SEBI so directs in the interest of the Unit holders.
-

I. Introduction

A. RISK FACTORS

Standard Risk Factors

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs 1 lakh made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

Specific Risk Factors

Risk Factors Associated with Fixed Income and Money Market Instruments:

- a) The Scheme may invest in debt and debt related instruments, as may be permitted by SEBI, from time to time. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities' purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. The length of time for settlement may affect the Scheme in the event the Scheme has to meet an exceptionally large number of redemption requests. The Scheme will retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements.
- b) A fundamental risk relating to all fixed income securities is a chance that an issuer will fail to make a principal and interest payment when due (credit risk). Issuers with higher credit risks typically offer higher yields for this added risk. Conversely, issuers with lower credit risk offer lower credit yields. Generally government securities are considered to be the safest in terms of the credit risk. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on a firm's credit quality and security values. While it is the intent of the Investment Manager to invest primarily in highly rated debt securities, the Schemes may from time to time invest in higher yielding, lower rated securities. This is likely to enhance the degree of credit risk. Besides all other factors remaining the same, instruments with the longer tenure are perceived to have a higher credit risk. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.
- c) All fixed income securities are also affected by changes in interest rates (interest rate risk). The prices of debt securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than the short-term securities. The Debt markets can be volatile leading to the possibility of up or down movements in prices of fixed income securities and thus the possible movements in the NAV. The Scheme(s) may use various hedging products from time to time, as are available and permitted by SEBI, to attempt to reduce the impact of undue market volatility on the Scheme's portfolio.
- d) Debt securities may also be subject to price volatility due to

factors such as market perception of the issuer and general market liquidity conditions (market risk).

- e) Lower rated or unrated securities are more likely to react to developments affecting the credit market than highly rated securities, which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated securities. The Investment Manager will consider both credit risk and market risk in making investment decisions.
- f) The corporate debt market is relatively illiquid vis-à-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.
- g) Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically and are likely to respond to changes in interest rates to a greater degree than other coupon bearing securities having similar maturities and credit quality.
- h) Apart from normal credit risk, zero coupon bonds carry an additional risk, unlike bonds that pay interest throughout the period to maturity, zero coupon instruments/deferred interest bonds typically would not realise any cash until maturity or till the time interest payment on the bonds commences. If the issuer defaults, the Schemes may not obtain any return on its investment.
- i) The Schemes may invest in securities which are not quoted on a stock exchange ("unlisted securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market, and there can be no assurance that the Schemes will realise its investments in unlisted securities at a fair market value, if sold in the secondary market
- j) There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.
- k) Prepayment Risk: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- l) Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Plans are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- m) Settlement Risk: The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Scheme's portfolio due to the extraneous factors that may impact liquidity would result at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in the Scheme's portfolio.
- n) Regulatory Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the Scheme.

- o) The value of the Scheme's investments may be affected generally by factors affecting capital markets, such as interest rates, currency exchange rates, foreign investment, changes in government policy, taxation and political, economic or other developments. Consequently, the net asset value of the Scheme may fluctuate and the value of the Scheme's Units may go down or up. Past performance of the sponsors is not necessarily indicative of future performance of the Scheme.
- p) Money Market instruments are instruments that are generally have maturity of less than one year. The NAV of the Scheme's Units, will be affected by the changes in the level of interest rates.
- q) Investments in money market instruments and debt instruments involve credit risk commensurate with short term rating of the issuers.

The fund has a rigorous credit research process. The team analyses and approves each issuer before investment by the Scheme. Further there is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. These conditions will be complied with, immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, the Scheme shall be wound up in accordance with Regulation 39 (2) (c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the applications to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within 5 working days from the date of closure of the New Fund Offer.

C. SPECIAL CONSIDERATIONS

- a) Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Scheme's investments include, but are not limited to, fluctuations in the equity and bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes, etc.
- b) The past performance of the mutual funds managed by the Sponsors and their affiliates / associates is not indicative of the future performance of the Scheme.
- c) Investment decisions made by the AMC / Investment Manager may not always be profitable.
- d) Lower rated or unrated securities are more likely to react to developments affecting the market and the credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated securities. The Investment Manager will consider both credit risk and market risk in making investment decisions.
- e) Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest

periodically and are likely to respond to changes in interest rates to a greater degree than other coupon bearing securities having similar maturities and credit quality.

- f) The Scheme in accordance with the Regulations can invest in securities which are not quoted on a stock exchange ("unlisted securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market and there can be no assurance that the Schemes will realise its investments in unlisted securities at a fair value.
- g) Different types of securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the Scheme's risk may increase or decrease depending upon its investment pattern.
- h) The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian / sub-custodians etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs and overseas regulatory costs.
- i) As liquidity of the Schemes' investments could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Schemes' portfolio. In view of this, the Trustee has the right, in its sole discretion to limit redemptions (including suspending redemption) under certain circumstances, as described under the section titled "Right to Limit Redemptions".
- j) In case the Schemes utilize any derivatives, under the SEBI Regulations, the Schemes may, in certain situations, be exposed to price risks.
- k) It is compulsory for mutual funds to dematerialise their holdings in certain notified securities / companies.
- l) Certain focus areas are already enjoying favourable tax treatment by Government of India. Other focus areas the Schemes may also receive favourable tax treatment. If these tax benefits are removed or amended, it is possible that the changes may have a material adverse impact on the companies' revenue and earnings.
- m) As the liquidity of the Scheme's investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Scheme's portfolio. In view of this, the Trustee has the right, in its sole discretion, to limit redemptions under certain circumstances.
- n) Neither this SID nor the units have been registered in any jurisdiction outside India. The distribution of this SID in certain jurisdictions may be restricted or subject to registration requirements and, accordingly, persons who come into possession of this SID in such jurisdictions are required to inform themselves about, and to observe, any such restrictions. No person receiving a copy of this SID or any accompanying application form in such jurisdiction may treat this SID or such application form as constituting an invitation to them to subscribe for Units, nor should they in any event use any such application form, unless in the relevant jurisdiction such an invitation could lawfully be made to them and such application form could lawfully be used without compliance with any registration or other legal requirements.
- o) The Schemes may be narrowly focused among sectors and therefore, changes in a particular industry can have substantial impact on the Schemes NAV.

Investors are advised to study the terms of the offer carefully before investing in the Scheme, and to retain this SID for future reference.

Risk Mitigation measures by AMC

Nature of Risk	Risk Mitigation Measures by AMC
Credit Risk: Debt securities are subject to the risk of an issuer's inability to meet principal and interest payments on the obligations. Instruments with the longer tenure are perceived to have a higher credit risk.	The fund has a rigorous credit research process. The credit team analyses and approves each issuer before investment by the scheme. Further there is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.
Liquidity Risk: The corporate debt market is relatively illiquid vis-à-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.	The funds are envisaged to be actively managed portfolios. The liquidity and volatility of a security is an important criteria in security selection process. This ensures that liquidity risk is minimized.
Investing in unrated securities: Lower rated or unrated securities are more likely to react to developments affecting the market and the credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated securities.	The scheme(s) does not intend to invest in unrated securities.
Investing in unlisted securities: The Schemes may invest in securities which are not quoted on a exchange ("unlisted securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market and there can be no assurance that the Schemes will realise its investments in unlisted securities at a fair value.	The scheme will be predominantly invest in listed securities and in some case in securities which are expected to be listed.
Settlement Risk: There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.	The AMC has a strong operational team and well laid out processes and system, which mitigate operational risks attached with the settlement process.

Debt Market in India

The Indian debt market, one of the largest in Asia, is developing rapidly buoyed by a multitude of factors including new instruments, increased liquidity, deregulation of interest rates and improved settlement systems. The major players in the Indian debt markets today are banks, financial institutions, insurance companies, pension funds, provident funds and mutual funds. The instruments in the market can be broadly categorized as those issued by corporates, banks, financial institutions and those issued by state/central governments. The risks associated with any investments are - credit risk, interest rate risk and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The largest segment of the Indian Debt market consists of the Government of India securities where the daily trading volume is in excess of Rs. 2000 crores, with instrument tenors ranging from short dated Treasury Bills to long dated securities extending upto 30 years. The Corporate bond market, though relatively less liquid, is also fast developing with an increased participation from the banks, Financial Institutions, mutual funds, provident funds, insurance companies and corporate treasuries. Also there are a large number of instruments available like MIBOR linked bonds, commercial papers and medium to long dated fixed and floating rate bonds. The yield curve usually tends to be positive sloping i.e. yield of shorter dated securities being lower than that of longer dated ones.

The money markets in India essentially consist of call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at specified

price), CBLO, commercial papers (CPs, short term unsecured promissory note, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). A predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates.

The various instruments currently available for investments are:

Instruments	Yield Range* (as of August 28, 2012)	Liquidity
Central / State Government securities	8.00% - 8.90%	Very High
PSU Bonds / Corporate debentures	9.00% - 9.75%	Medium - High
Securitized debt	10.50% - 12.00%	Low - Medium
Commercial Papers / Certificate of deposits	8.50% - 11.00%	Medium - High
Call / Notice Money	7.50% - 8.50%	Very High
Repo	7.00% - 8.00%	Very High

*Source: RBI and Bloomberg (These rates derived from information obtained from third party sources. While care has been taken to ensure accuracy, the same is not guaranteed.)

The actual yields will, however, vary in line with general levels of interest rates and debt / money market conditions prevailing from time to time.

E. SCHEME'S INVESTMENTS

DFMP - 16 will invest in debt and money market instruments. The Scheme retains the flexibility to invest across all the securities in the debt and money markets. From time to time the Scheme may also hold cash.

Debt securities and Money Market Instruments will include but will not be limited to:-

- Securities created and issued by the Central and State Governments and / or repos / reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- Debt obligations of domestic Government agencies and statutory bodies, which may or may not carry a Central / State Government guarantee
- Corporate debt and securities (of both public and private sector undertakings) including Bonds, Debentures, Notes, Scrips, etc.
- Obligations of banks (both public and private sector) and development financial institutions
- Securitized Debt obligations
- Non-convertible part of convertible debentures
- Money market instruments as permitted by SEBI / RBI, call money market or in alternative investments for the call money market as may be provided by RBI to meet the liquidity requirements and as defined under The SEBI (Mutual Funds) Regulations, 1996.
- Certificate of Deposits (CDs)
- Domestic fixed income securities including Structured Obligations
- Any other like instruments as may be permitted by RBI / SEBI / such other Regulatory Authority from time to time.

The Scheme could invest in Fixed/Floating rate Securities issued by government, quasi government entities, corporate issuers, structured notes and multilateral agencies. The securities mentioned above could be listed or unlisted, privately placed, secured or unsecured, rated or un-rated and of any maturity, as enabled under SEBI Regulations/ circulars/ RBI. The securities may be acquired from primary market, secondary market operations, private placement or negotiated deals. Pending deployment of the funds collected in the Scheme, funds of the

Scheme can be parked in Short Term Deposits of Scheduled Commercial Banks subject to compliance with the SEBI Circular. The Scheme may also enter into repurchase and reverse repurchase obligations in all securities held by it as per the guidelines and regulations applicable to such transactions

The Scheme may invest in other debt Schemes managed by the AMC or in the debt Schemes of any other Mutual Funds, provided it is in conformity to the investment objectives of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments and the aggregate inter Scheme investment made by all Schemes of Deutsche Mutual Fund or in the Schemes under the management of other asset management companies shall not exceed 5% of the net asset value of the Deutsche Mutual Fund.

The Scheme does not intend to enter into underwriting obligations. However, if the Scheme does enter into an underwriting agreement, it would do so after complying with the Regulations and with the requisite approval of the Board of the AMC / Trustee.

The AMC will not invest in any of the Schemes unless full disclosure of its intention to invest has been made in the SID and that the AMC will not charge any fees on such investments.

Additional Disclosures for close ended debt Funds

a) Credit Evaluation Policy

We maintain a 'fixed income' universe of approved securities for all the fixed income portfolios.

Credits are researched through a credit research exercise which includes inter-alia, meeting with borrower (usually includes the finance team and senior management/ personnel in decision making roles) and the rating agencies (could also be a concall) to understand the business / financial and business prospects / credit outlook. In addition, financial analysis is carried based on past performance.

Emphasis is also laid on reviewing the non financial aspects such as promoter track-record, audit quality and market intelligence.

All names are researched by the analyst and discussed with the head - fixed income to be approved and included in the Universe. The IRC also reviews periodically the additions to the Credit universe.

b) Negative list of sectors

The Scheme will not invest in the securities of Real Estate, Airlines, Gems and Jewellery, Micro Finance, Chit Fund and Sugar Sectors.

The scheme will not invest more than 30% of the debt portion of AUM in a single sector. Further the sector will be considered as per the AMFI classification.

This sector specific limit will not be applicable:

- i) AAA rated instruments of PSU Banks and AAA rated instruments of Public Financial Institutions (PFIs), , if the investments in respect of the above mentioned 30% limit is in securities of NBFC (issuer) having AAA (long term) and A1+ (Short term) rating.
- ii) Certificate of Deposits (CDs),
- iii) CBLO,
- iv) G Sec and
- v) T Bills.

c) Type of instruments in which the Scheme propose to invest in :

Non Convertible Debentures / Bonds including Structured Obligations

d) Intended allocation against each sub asset class / credit ratings will be as per below matrix:

Credit rating	AAA/A1+	AA	A	BBB
Instruments				
Certificates of Deposits	-	-	-	-
Commercial Papers	-	-	-	-
Non Convertible Debentures / Bonds including Structured Obligations	70% - 75%	25%-30%	-	-
Securitized Debt including Pass Through Certificates (PTCs)	-	-	-	-
Cash & Cash Equivalents (CBLO, Reverse Repo, T Bills)	-	-	-	-

- a) In case of Certificates of Deposits, the Scheme will invest in the instruments with the highest credit rating i.e. A1+.
- b) Each of the rating categories such as AA, A etc would also include ratings with '+' and '-' i.e. AA rating will include AA+ and AA- also.
- c) There will not be any variation between intended allocation and actual allocation except in following cases:
 - i. In case of credit ratings of sub assets class, there could be a possibility of positive variation in investments towards higher credit rating of the same instruments.
 - ii. At the time of building up the portfolio post NFO and toward the maturity of the Scheme, there may be a higher allocation to cash & cash equivalent.
 - iii. In case of non availability of NCD or after taking into consideration of risk factors associated with NCDs, the Scheme may invest into CDs of highest credit ratings (A1+) / CBLO / T-bills. Such deviation may continue till the desired quality instruments are not available.
- d) If there is any deviation from floor and ceiling of the credit ratings specified for instruments, the same will be rebalanced within 30 days from the date of deviation.
- e) All the investments will be based on the credit ratings available / prevalent at the time of the investments.
- f) In case, there is dual credit ratings available for the same instruments, the most conservative rating publicly available at the time of investments will be taken into consideration at the time of investments.
- g) The Scheme will not invest in unrated debt instruments.
- h) The Scheme will not invest in derivatives.

F. INVESTMENT STRATEGY

The Fund Management team endeavours to meet the investment objective whilst maintaining a balance between safety and return on investments. Since the Scheme is a close ended scheme with a defined maturity, the fund manager would invest in securities maturing within the maturity period of the Scheme. The Scheme shall be actively managed and the Fund Management team may endeavor to generate returns whilst moderating credit and interest rate risk. The Fund Manager shall formulate a view of the interest rate movement based on various parameters of the Indian economy, as well as developments in global markets. The Investment Manager may try to leverage its international resource base to understand the global economic and interest rate environment. Deutsche Asset Management (DeAM) has a proprietary research platform, accessed by DeAM investment professionals across the globe. Research inputs alongwith discussions with colleagues across the globe on the global economic environment provide the fund management team with a global perspective.

Investment views/decisions inter alia may be taken on the basis of the following parameters:

- Returns offered relative to alternative investment opportunities.
- Prevailing interest rate scenario

- Quality of the security/instrument (including the financial health of the issuer)
- Maturity profile of the instrument
- Any other factors considered relevant in the opinion of the Fund Management team.

The Scheme may also use derivatives to reduce the volatility of the portfolio and/or to enhance the portfolio returns. The Scheme may try to identify securities that yield relative value over others for similar risk and liquidity level. Various analytical tools like yield curve analysis, spreads between asset classes, horizon returns, forward implied interest rates, may be deployed to evaluate various investment options.

Investments in debt instruments carry various risks like interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst these cannot be done away with, they may be minimized by diversification.

Risk Control

Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.

The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. Stock specific risk will be minimized by investing only in those companies that have been analyzed by the Investment Team at the AMC. For investments in debt securities, the AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous and in-depth credit evaluation of the securities proposed to be invested in, will be carried out by the investment team of the AMC. Rated Debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC will be guided but not limited by the ratings of Rating Agencies such as CRISIL, CARE, ICRA and Duff and Fitch or any other rating agencies that may be registered with SEBI from time to time. In case a debt instrument is not rated, all the investments in unrated papers are periodically reviewed by the Investment Review Committee.

The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest.

Procedure and Recording of Investment Decisions:

- The Fund Manager for the Scheme is responsible for making buy / sell decisions in respect of the securities in the respective Schemes' portfolios. The investment decisions are made on a daily basis keeping in view the market conditions and all relevant aspects.
- The Board of the AMC has constituted an Investment Review Committee that will meet at periodic intervals. The Investment Review Committee, at its meetings, will review all investments made by the Scheme. The Investment review committee will consist of Chief Executive Officer, Chief Operating Officer, Chief Investment Officer, Head - Fixed Income/Fund Manager, Head-Domestic Equity, Compliance Officer & Company Secretary. The Board of the AMC may add more members to the committee as and when required
- Investment Review Committee will review all investments in unrated securities. The approval of unrated debt instruments will be based on parameters laid down by the Board of the AMC and the Trustees. The details of such investments will be communicated by the AMC to the Trustees in their periodical reports along with a disclosure regarding how the parameters have been complied with. Such reporting shall be in the manner prescribed by SEBI from time to time. The Committee will also review the performance of the Scheme(s) and general market outlook and assess the investment pattern of the Scheme with regard to parameters and directions laid down in the Key Operating Procedure for Equity and Fixed Income.
- It is the responsibility of the AMC to ensure that the investments are made as per the internal / Regulatory guidelines, Scheme investment objectives and in the interest of the Unitholders of the respective Scheme(s).

- The CEO/ CIO/Fund Manager will make presentations to the Board of the AMC and the Trustees periodically, indicating the performance of the Scheme(s). Among other things, the Board of AMC and Trustee will review the performance of the Scheme in comparison to the benchmark. The Trustees reserve the right to change the benchmark for evaluation of performance of the Scheme from time to time in conformity with the Investment objectives and appropriateness of the benchmark subject to SEBI Regulations, and other prevailing guidelines, if any.
- The CEO/ CIO/ Fund Manager will bring to the notice of the AMC Board, specific factors if any, which are impacting the performance of any individual Scheme. The Board on consideration of all relevant factors may, if necessary, give appropriate directions to the AMC. Similarly, the performance of the Scheme(s) will be submitted to the Trustees. CEO/CIO/ Fund Manager will explain to the Trustees, the details on the Schemes' performance vis-à-vis the benchmark returns. The Trustees and the AMC board may also review the performance of the Schemes in the light of performance of the mutual funds industry as published from time to time by independent research agencies and financial newspapers and journals and may take corrective action in case of unsatisfactory performance.
- All investment decisions shall be recorded in terms of SEBI Circular no MFD/CIR/6/73/2000 dated July 27, 2000 or as may be revised by SEBI from time to time. Scheme. Such changes in the investment pattern will be for short term and defensive considerations.

G. FUNDAMENTAL ATTRIBUTES

Following are the Fundamental Attributes of the Scheme, in terms of Regulation 18 (15A) of the SEBI (MF) Regulations:

(i) Type of a Scheme

- Close ended debt fund

(ii) Investment Objective

- Main Objective - Growth / Income / Both.
- Investment pattern - The tentative Debt/Money Market portfolio break-up with minimum and maximum asset allocation, while retaining the option to alter the asset allocation for a short term period on defensive considerations.

(iii) Terms of Issue

- Liquidity provisions such as listing.
- Aggregate fees and expenses charged to the Scheme.

In accordance with Regulation 18(15A) of the SEBI (MF) Regulations, the Trustees shall ensure that no change in the fundamental attributes of the Scheme(s) and the Plan(s) / Option(s) thereunder or the trust or fee and expenses payable or any other change which would modify the Scheme(s) and the Plan(s) / Option(s) there under and affect the interests of Unitholders is carried out unless:

- A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
- The Unitholders are given an option for a period of 30 days to exit at the prevailing Net Asset Value without any exit load.

H. BENCHMARK

The Benchmark index of the Scheme shall be as follows:

CRISIL Short Term Bond Index.

CRISIL Short Term Bond Index

The Short Term Bond Index tracks the return on a short term portfolio that includes Call instruments, Commercial Paper, Government securities as well as AA and AAA rated instruments.

This index is a realistic estimate for a mutual fund scheme that tends to invest in all of the above mentioned short term instruments to maximize returns at a particular level of risk.

The Scheme intends to invest in most of these instruments. Therefore, CRISIL Short Term Bond Fund Index are a convenient, appropriate and easily available tool for analysis and capture of market movements and for determining the corresponding effect on a portfolio consisting of the above-mentioned instruments.

Among other things, the Board of AMC and Trustee will review the performance of the Scheme in comparison to the benchmark. The Trustees reserve the right to change the benchmark for evaluation of performance of the Scheme from time to time in conformity with the Investment objectives and appropriateness of the benchmark subject to SEBI Regulations, and other prevailing guidelines, if any.
