I. Introduction

A. RISK FACTORS

Standard Risk Factors

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs 1 lakh made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

Specific Risk Factors

Risk Factors Associated with Fixed Income and Money Market Instruments:

- a) The Scheme may invest in debt and debt related instruments, as may be permitted by SEBI, from time to time. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities' purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. The length of time for settlement may affect the Scheme in the event the Scheme has to meet an exceptionally large number of redemption requests. The Scheme will retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements.
- b) A fundamental risk relating to all fixed income securities is a chance that an issuer will fail to make a principal and interest payment when due (credit risk). Issuers with higher credit risks typically offer higher yields for this added risk. Conversely, issuers with lower credit risk offer lower credit yields. Generally government securities are considered to be the safest in terms of the credit risk. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on a firm's credit quality and security values. While it is the intent of the Investment Manager to invest primarily in highly rated debt securities, the Schemes may from time to time invest in higher yielding, lower rated securities. This is likely to enhance the degree of credit risk. Besides all other factors remaining the same, instruments with the longer tenure are perceived to have a higher credit risk. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.
- c) All fixed income securities are also affected by changes in interest rates (interest rate risk). The prices of debt securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than the short-term securities. The Debt markets can be volatile leading to the possibility of up or down movements in prices of fixed income securities and thus the possible movements in the NAV. The Scheme(s) may use various hedging products from time to time, as are available and permitted by SEBI, to attempt to reduce the impact of undue market volatility on the Scheme's portfolio.
- d) Debt securities may also be subject to price volatility due to factors such as market perception of the issuer and general market liquidity conditions (market risk).
- e) Lower rated or unrated securities are more likely to react to developments affecting the credit market than highly rated securities, which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more

sensitive to economic conditions than higher rated securities. The Investment Manager will consider both credit risk and market risk in making investment decisions.

- f) The corporate debt market is relatively illiquid vis-à-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.
- g) Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically and are likely to respond to changes in interest rates to a greater degree than other coupon bearing securities having similar maturities and credit quality.
- h) Apart from normal credit risk, zero coupon bonds carry an additional risk, unlike bonds that pay interest throughout the period to maturity, zero coupon instruments/deferred interest bonds typically would not realise any cash until maturity or till the time interest payment on the bonds commences. If the issuer defaults, the Schemes may not obtain any return on its investment.
- i) The Schemes may invest in securities which are not quoted on a stock exchange ("unlisted securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market, and there can be no assurance that the Schemes will realise its investments in unlisted securities at a fair market value, if sold in the secondary market
- j) There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.
- k) Prepayment Risk: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the Fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the Fund.
- l) Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- m) Settlement Risk: The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Scheme's portfolio due to the extraneous factors that may impact liquidity would result at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in the Scheme's portfolio.
- n) Regulatory Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the Scheme.
- o) The value of the Scheme's investments may be affected generally by factors affecting capital markets, such as interest rates, currency exchange rates, foreign investment, changes in government policy, taxation and political, economic or other developments. Consequently, the net asset value of the Scheme may fluctuate and the value of the Scheme's Units may go down or up. Past performance of the sponsors is not necessarily indicative of future performance of the Scheme.

- p) Money Market instruments are instruments that are generally have maturity of less than one year. The NAV of the Scheme's units, will be affected by the changes in the level of interest rates.
- q) Investments in money market instruments and debt instruments involve credit risk commensurate with short term rating of the issuers.

The fund has a rigorous credit research process. The team analyses and approves each issuer before investment by the Scheme. Further there is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.

Risk factors associated with Trading in Derivatives:

- a) Derivatives are high risk, high return instruments as they may be highly leveraged. A small price movement in the underlying security could have a large impact on their value and may also result in a loss.
- b) Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
- c) The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
- d) The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limits or circuit breakers / filters, the Scheme may face a liquidity issue.
- e) The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets
- f) The Fund may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements, Interest Rate Future or other derivatives
- g) Credit Risk: This occurs when a counterparty defaults on a transaction before settlement and therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavorable) market price, in order to maintain the validity of the hedge
- h) Market risk: This is where the derivatives cannot be sold (unwound) or purchased at prices that reflect the underlying assets, rates and indices
- i) Model Risk: This is the risk of mis-pricing or improper valuation of derivatives
- j) Basis Risk: This is when the instrument used as a hedge does not match the movement in the instrument / underlying asset being hedged. The risks may be inter-related also; for e.g. interest rate movements can affect equity prices, which could influence specific issuer / industry assets.
- k) Floating Leg Risk: The fund pays the daily compounded rate. In practice however there can be a difference in the actual rate at which money is lent in the call market and the benchmark, which appears and is used. The risk is to the extent that returns are limited for the investors in case of extreme movement in call rates.
- l) In case of a received position in a call rate linked interest rate swaps (OIS), the fund pays the daily compounded rate. In practice however there can be a difference in the actual rate at which money is lent in the call market and the benchmark call rate, which is used in the swap calculations. The risk is to the extent that returns may be impacted to the investors in case of extreme movement in call rates.
- m) It may be mentioned here that the guidelines issued by Reserve Bank of India/SEBI from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to.

Please refer to page 13 of this document for an illustration on potential loss which could be caused by investments in derivative instruments.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. These conditions will be complied with, immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, the Scheme shall be wound up in accordance with Regulation 39 (2) (c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the applications to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within 5 working days from the date of closure of the New Fund Offer.

C. SPECIAL CONSIDERATIONS

- a) Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Scheme's investments include, but are not limited to, fluctuations in the equity and bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes, etc.
- b) The past performance of the mutual funds managed by the Sponsors and their affiliates / associates is not indicative of the future performance of the Scheme.
- c) Investment decisions made by the AMC / Investment Manager may not always be profitable.
- d) Lower rated or unrated securities are more likely to react to developments affecting the market and the credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated securities. The Investment Manager will consider both credit risk and market risk in making investment decisions.
- e) Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically and are likely to respond to changes in interest rates to a greater degree than other coupon bearing securities having similar maturities and credit quality.
- f) The Scheme in accordance with the Regulations can invest in securities which are not quoted on a stock exchange ("unlisted securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market and there can be no assurance that the Schemes will realise its investments in unlisted securities at a fair value.
- g) Different types of securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the Scheme's risk may increase or decrease depending upon its investment pattern.
- h) The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian / sub-custodians etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and

costs, fees of appointed advisors and sub-managers, transaction costs and overseas regulatory costs.

- i) It is compulsory for mutual funds to dematerialise their holdings in certain notified securities / companies.
- j) Certain focus areas are already enjoying favourable tax treatment by Government of India. Other focus areas the Schemes may also receive favourable tax treatment. If these tax benefits are removed or amended, it is possible that the changes may have a material adverse impact on the companies' revenue and earnings.
- k) As the liquidity of the Scheme's investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Scheme's portfolio. In view of this, the Trustee has the right, in its sole discretion, to limit redemptions under certain circumstances.
- l) Neither this SID nor the units have been registered in any jurisdiction outside India. The distribution of this SID in certain jurisdictions may be restricted or subject to registration requirements and, accordingly, persons who come into possession of this SID in such jurisdictions are required to inform themselves about, and to observe, any such restrictions. No person receiving a copy of this SID or any accompanying application form in such jurisdiction may treat this SID or such application form as constituting an invitation to them to subscribe for Units, nor should they in any event use any such application form, unless in the relevant jurisdiction such an invitation could lawfully be made to them and such application form could lawfully be used without compliance with any registration or other legal requirements.
- m) The Schemes may be narrowly focused among sectors and therefore, changes in a particular industry can have substantial impact on the Schemes NAV.

Investors are advised to study the terms of the offer carefully before investing in the Scheme, and to retain this SID for future reference.

Compliance under Foreign Account Tax Compliance Act (FATCA) regulations

The Internal Revenue Service (IRS) of the United States of America introduced the Foreign Account Tax Compliance Act (FATCA) Regulations in the year 2010. FATCA regulations (whether proposed, temporary or final), including any subsequent amendments, any agreements signed by the US government to implement these regulations, and administrative guidance promulgated there under (or which may be promulgated in the future) impose or may impose a number of obligations on financial institutions. The intention of FATCA is that details of U.S. investors holding assets outside the US will be reported by financial institutions to the United States Internal Revenue Service (IRS), as a safeguard against U.S. tax evasion. As a result of FATCA, and to discourage non-U.S. financial institutions from staying outside this regime, financial institutions that do not enter and comply with the regime will be subject to a 30% penalty withholding tax with respect to certain U.S. source income (including dividends) and gross proceeds from the sale or other disposal of property that can produce U.S. source income. Sections 1471 through 1474 of the U.S. Internal Revenue Code impose a 30% withholding tax on certain payments to a foreign financial institution ("FFI") if that FFI is not compliant with FATCA.

The Mutual Fund is a FFI and thus, subject to FATCA. Beginning 1 July 2014, this withholding tax applies to payments to the Fund that constitute interest, dividends and other types of income from U.S. sources (such as dividends paid by a U.S. corporation) and beginning on 1 January 2017, this withholding tax is extended to the proceeds received from the sale or disposition of assets that give rise to U.S. source dividend or interest payments. These FATCA withholding taxes may be imposed on payments to the Mutual Fund unless (i) the Mutual Fund becomes FATCA compliant pursuant to the provisions of FATCA and the relevant regulations, notices and

announcements issued there under, or (ii) the Mutual Fund is subject to an appropriate Inter-governmental Agreement ("IGA") to improve international tax compliance and to implement FATCA. India has agreed "in substance" with IRS for Inter Governmental Agreement Model 1 (IGA-1) on 11th April 2014. Under IGA-1 model, Mutual Funds are required to institute a process to identify US Person investors and report the same. The formal IGA is yet to be signed by the Indian government.

Pursuant to the above, the Applicant agrees and undertakes to provide such information and/or documentation concerning itself and its direct and indirect beneficial owners (if any), as and when requested by the Mutual Fund or the AMC, at its sole discretion, determines it necessary or advisable for the Mutual Fund / AMC to comply with its obligations under FATCA. The AMC may at its own discretion, decide to impement any of the 2 options mentioned below

Option #1 [Compulsory closure- if documents / info not received within 1 year of signing of IGA]

Risk Mitigation measures by AMC

Nature of Risk	Risk Mitigation Measures by AMC
Credit Risk: Debt securities are subject to the risk of an issuer's inability to meet principal and interest payments on the obligations.	The fund has a rigorous credit research process. The credit team analyses and approves each issuer before investment by the scheme. There is a regulatory and internal cap on exposure to each issuer. This ensures a diversified portfolio and reduced credit risk in the portfolio.
Liquidity Risk: The corporate debt market is relatively illiquid vis-à-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.	The funds are envisaged to be actively managed portfolios. The liquidity and volatility of a security is an important criteria in security selection process. This ensures that liquidity risk is minimized.
Investing in unlisted securities: The Schemes may invest in securities which are not quoted on a exchange ("unlisted securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market and there can be no assurance that the Schemes will realise its investments in unlisted securities at a fair value.	The scheme will be predominantly invest in listed securities and in some case in securities which are expected to be listed. Further, listing of debt securities typically has no significant impact on the liquidity, trading volatility and price discovery.
Settlement Risk: There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.	The AMC has a strong operational team and well laid out processes and system, which mitigate operational risks attached with the settlement process.

B. TYPE OF THE SCHEME

Close ended debt fund

C. INVESTMENT OBJECTIVE

The objective of the Scheme is to generate income by investing in debt and money market instruments maturing on or before the date of the maturity of the Scheme.

There can be no assurance that the investment objective of the Scheme will be realized.

D. ASSET ALLOCATION

Under normal circumstances, the asset allocation of the Scheme will be as under: -

Asset Class	Indicative Allocations (% of total assets)		Risk Profile**
	Minimum	Maximum	
Domestic debt instruments including government securities excluding money market instrument#	80%	100%	Low to Medium
Money Market Instruments	0%	20%	Low

The Scheme retains the flexibility to invest across all the securities in the debt and money markets as permitted by SEBI / RBI from time to time.

including derivatives instruments to the extent of 50% of the Net Assets as permitted vide SEBI Circular no. DNP/Cir 29/2005 dated September 14, 2005 and SEBI Circular No. DNP/Cir-30/ 2006 dated January 20, 2006, SEBI circular No. SEBI/DNP/Cir- 31/2006 dated September 22, 2006 and SEBI Circular No. Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010. The Scheme may use fixed income derivatives for such purposes as maybe permitted by the Regulations, including for the purpose of hedging and portfolio balancing, based on the opportunities available and subject to guidelines issued by SEBI from time to time.

The Scheme will not invest in foreign securities. The Scheme will not participate in Repo in corporate debt securities and Credit Default Swaps. The Scheme will not invest in scrip lending. The Scheme will not invest in equity linked debentures. The cumulative gross exposure through debt, money market instruments and fixed income derivative positions shall not exceed 100% of the net assets of the Scheme(s). The Scheme will not have a leveraged position in derivatives. The Scheme will not participate in short selling of securities. Investment in Interest Rate Futures (IRF) will be counted as exposure unless it is a perfect hedge (i.e. have the same security). The scheme will not invest in Securitized Debt.

The schemes would rebalance deviations, if any, from the above mentioned asset allocation as follows:

- For Fixed Maturity Plan having tenure more than 6 months: 30 days

** Risk profile refers to the price risk of the respective asset class. Please refer risk factors for more details.

As per the SEBI Regulations, investments shall be made only in such securities which mature on or before the date of the maturity of the Scheme.

Debt Market in India

The Indian debt market, one of the largest in Asia, is developing rapidly buoyed by a multitude of factors including new instruments, increased liquidity, deregulation of interest rates and improved settlement systems. The major players in the Indian debt markets today are banks, financial institutions, insurance companies, pension funds, provident funds and mutual funds. The instruments in the market can be broadly categorized as those issued by corporates, banks, financial institutions and those issued by state/central governments. The risks associated with any investments are - credit risk, interest rate risk and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities carry zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The largest segment of the Indian Debt market consists of the Government of India securities where the daily average trading volume is in excess of Rs. 5000 crores, with instrument tenors ranging from short dated Treasury Bills to long dated securities extending upto 30 years. The Corporate bond market, though relatively less liquid, is also fast developing with an increased participation from the banks, Financial Institutions, mutual funds, provident funds, insurance companies and corporate treasuries. Also there are a large number of instruments available like MIBOR linked bonds, commercial papers and medium to long dated fixed and floating rate bonds. The yield curve usually tends to be positive sloping i.e. yield of shorter dated securities being lower than that of longer dated ones.

The money markets in India essentially consist of call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at specified price), CBLO, commercial papers (CPs, short term unsecured promissory note, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). A predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates.

The various instruments currently available for investments are:

Instruments	Yield Range* (as of May 22, 2015)	Liquidity
Central / State Government Securities	8.00%- 8.50%	Very High
PSU Bonds / Corporate Debentures	8.50% - 11.00%	Medium - High
Securitized debt	10.00% - 12.50%	Low - Medium
Commercial Papers / Certificate of deposits	8.50% - 11.00%	Medium - High
Call / Notice Money	7.50 % - 8.00%	Very High
Repo	6.50% - 7.50%	Very High

*Source: RBI and Bloomberg (These rates derived from information obtained from third party sources. While care has been taken to ensure accuracy, the same is not guaranteed.)

The actual yields will, however, vary in line with general levels of interest rates and debt / money market conditions prevailing from time to time.

E. SCHEME'S INVESTMENTS

DFMP – 91 will invest only in debt and money market instruments. The Scheme retains the flexibility to invest across all the securities in the debt and money markets as permitted by RBI and SEBI from time to time.

Debt securities and Money Market Instruments will include but will not be limited to:-

- Securities created and issued by the Central and State Governments and / reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)

- i) Fixed Income Derivative instruments like Exchange Traded Interest Rate Futures, Interest Rate Swaps, Forward Rate Agreements and such other derivative instruments as permitted by SEBI/ RBI
- j) Any other like instruments as may be permitted by RBI / SEBI / such other Regulatory Authority from time to time.

The Scheme could invest in Fixed/Floating rate Securities issued by government, quasi government entities, corporate issuers, structured notes and multilateral agencies Structured Obligation transactions, usually incorporate some form of credit enhancement / payment mechanism which isolate cash flows to be prioritized for repayment on the security, thus enhance credit quality for the investor. The securities mentioned above could be listed or unlisted, privately placed, secured or unsecured, rated and of any maturity, as enabled under SEBI Regulations/ circulars/ RBI. The securities may be acquired from primary market, secondary market operations, private placement or negotiated deals. Pending deployment of the funds collected in the Scheme, funds of the Scheme can be parked in Short Term Deposits of Scheduled Commercial Banks subject to compliance with the SEBI Circular No. SEBI/IMD/CIR No.9/20306/03 dated November 12, 2003, SEBI Circular No. SEBI/IMD/Cir No.1/91171/07 dated April 16, 2007, SEBI and Clause 8 of Seventh Schedule of Mutual Funds Regulations, 1996 and SEBI Circular No. SEBI/IMD/Cir No.1/91171/07 dated April 16, 2007. The Scheme may invest in other debt Schemes managed by the AMC or in the debt Schemes of any other Mutual Funds, provided it is in conformity to the investment objectives of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments and the aggregate inter Scheme investment made by all Schemes of Deutsche Mutual Fund or in the Schemes under the management of other asset management companies shall not exceed 5% of the net asset value of the Deutsche Mutual Fund.

The Scheme does not intend to enter into underwriting obligations. However, if the Scheme does enter into an underwriting agreement, it would do so after complying with the Regulations and with the requisite approval of the Board of the AMC / Trustee.

The AMC may invest in any of the schemes of Deutsche Mutual Fund subject to the SEBI Regulations and circular issued by SEBI and to the extent permitted by its Board of Directors from time to time. The AMC will not charge any fees on such investments.

Additional Disclosures for close ended debt Funds

a) Credit Evaluation Policy

We maintain a 'fixed income' universe of approved securities for all the fixed income portfolios.

Credits are researched through a credit research exercise which includes inter-alia, meeting with borrower (usually includes the finance team and senior management/ personnel in decision making roles) and the rating agencies (could also be a concall) to understand the business / financial and business prospects / credit outlook. In addition, financial analysis is carried based on past performance.

Emphasis is also laid on reviewing the non financial aspects such as promoter track-record, audit quality and market intelligence.

All names are researched by the analyst and discussed with the head - fixed income to be approved and included in the Universe.

The Investment Review Committee (IRC) also reviews periodically the additions to the Credit universe.

b) Negative list of sectors

The Scheme will not invest in the securities of Airlines, Gems & Jewellery.

c) Sector Limits

The total exposure of the Scheme in a particular sector (excluding investments in Bank CDs, CBLO, G-Secs, TBills and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) shall not exceed 30% of the net assets of the scheme.

However, the Scheme can have an additional exposure to financial services sector (over and above the limit of 30%) not exceeding 10% of the net assets of the scheme in Housing Finance Companies (HFCs). The additional exposure to such securities issued by HFCs should be rated AA and above and these HFCs should be registered with National Housing Bank (NHB) and the total investment/ exposure in HFCs shall not exceed 30% of the net assets of the Scheme. The sectors will be considered as per AMFI classification.

d) Type of instruments in which the Scheme propose to invest in :

Please refer to subsection II (E)

- e) Intended allocation against each sub asset class/credit rating will be as per below matrix:

Credit rating Instruments	A1+	AAA	AA	A	BBB	Credit Rating Not Applicable
Certificates of Deposits	—	—	—	—	—	—
Commercial Papers	—	—	—	—	—	—
Non Convertible Debentures / Bonds	—	—	95%-100	—	—	—
Securitized Debt	—	—	—	—	—	—
Cash & Cash Equivalents (CBLO, Reverse Repo, T Bills)	—	—	—	—	—	0%-5%

- a) In case of Certificates of Deposits, the Scheme will invest in the instruments with the highest credit rating i.e. A1+.
- b) Each of the rating categories such as AA, A etc would also include ratings with '+' and '-' i.e. AA rating will include AA+ and AA- also. The respective rating categories also include ratings with the suffix 'so'; issued by credit rating agencies for structured obligations.
- c) There will not be any variation between intended allocation and actual allocation except in following cases:
 - i. In case of credit ratings of sub assets class, there could be a possibility of positive variation in investments towards higher credit rating of the same instruments.
 - ii. At the time of building up the portfolio post NFO and toward the maturity of the Scheme, there may be a higher allocation to cash & cash equivalent including units of debt/ liquid schemes.
 - iii. In case instruments/ securities as indicated above are not available, taking into account risk – reward analysis of such instruments/ securities, the Scheme may invest in Certificate of Deposits (CDs) of banks having highest ratings (A1+)/ CBLOs/ Reverse Repo/ T-bills. Such deviations may exist till suitable securities as indicated above of desired credit quality are not available.
 - iv. Further, the allocation may vary during the tenure of the Scheme. Some of these instances are: (i) coupon inflow; (ii) the instrument is called or bought back by the issuer (iii) in anticipation of any adverse credit event. In case of such deviations, the Scheme may invest in Bank CDs of highest rating/CBLOs/ Reverse Repo / T-Bills.
- d) All the investments will be based on the credit ratings available / prevalent at the time of the investments.

- e) In case, there is dual credit ratings available for the same instruments, the most conservative rating publicly available at the time of investments will be taken into consideration at the time of investments.
- f) The Scheme will not invest in unrated debt instruments.
- g) The Scheme may invest in derivatives for the purpose of hedging, rebalancing and any other purpose as permitted by SEBI.
- h) In the event of any deviation from the asset allocation stated above except in case where the deviation is on account of the conditions stated in point C above, the Fund Manager shall rebalance the portfolio as follows:
 - For Fixed Maturity Plan having tenure more than 6 months: 30 days

Hedging Policies in connection with Trading in Derivatives

SEBI vide its circular no. MFD/CIR/011/061/2000 dated February 1, 2000 has permitted all the mutual funds to participate in the derivatives trading subject to observance of guidelines issued by SEBI in this behalf. Pursuant to this, the mutual funds may use various derivative and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unit holders' interest.

Pursuant to SEBI Circular no. MFD/CIR No. 03/ 158 /03 June 10, 2003, MFD/CIR/21/ 25467/2002 dated December 31, 2002, MFD/ CIR No. 03/ 158 /03 dated June 10, 2003, DNP/Cir/ 2005 dated September 14, 2005, DNP/Cir-30/2006 dated January 20, 2006, Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010 and such other circular issued by SEBI from time to time in this regard, the Fund may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements or other derivative instruments for the purpose of hedging and portfolio balancing or for its efficient management. Please also refer to para 5 and 6 on page 11 and 12 for other restrictions on use of derivative instruments.

The Fund may use derivative instruments like Interest Rate Swaps/ Forward Rate Agreements or other derivative for the purpose of hedging and portfolio rebalancing or for efficient management, as permitted under the Regulations and guidelines.

Further SEBI vide circulars nos. CIR/MRD/DRMNP/35/2013 dated December 5, 2013 and CIR/MRD/DRMNP/ 2/2014 dated January 20, 2014 has prescribed the framework for trading of cash settled Interest Rate Futures (IRF) and vide SEBI CIR/MRD/DRMNP/27/2014 dated September 15, 2014 has clarified that the position limits in IRF for Mutual Funds.

i. Position limits for the Mutual Fund for Interest Rate Futures:

- a) The gross open positions of the trading member across all contracts shall not exceed 10% of the total open interest or INR 600 crores, whichever is higher

ii. Position limits for the Scheme

- a) In case of interest rate futures, the gross open positions of the client across all contracts shall not exceed 3% of the total open interest or INR 200 crores, whichever is higher

Interest Rate Swaps:

An interest rate swap is an agreement whereby two parties agree to exchange periodic interest payments. The amount of interest payments exchanged is based on some predetermined principal, called notional principal amount. The amount each counter party pays to the other is the agreed upon periodic interest rate multiplied by the notional principal amount. The only amount that is exchanged between the parties are the interest payment, not the notional principal amount.

A Forward Rate Agreement, on the other hand, is an agreement between two counter parties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date based on a notional amount, for an agreed period.

In the most common type of swap one party agrees to pay the other party fixed interest payments at designated dates for the life

of contract. The other party agrees to make interest rate payments that float with some index.

The interest rate benchmarks that are commonly used for floating rate in an interest rate swap are those on various money market instruments. In Indian markets the benchmark most commonly used is MIBOR.

Swaps can be unwound by either reversing the original swap entered into or doing by a reverse swap with cash flows matching the original swap.

Example: Interest Rate Swap (IRS)

- Suppose the Scheme has a portion of its portfolio in cash. The Fund Manager has a view that the interest rate scenario is soft and call rates are unlikely to spurt over the next three months. The fund manager would therefore prefer to receive a higher rate of return on his cash, which he is lending in the overnight call market. In other words he would like to move to a 91 Day fixed interest rate from overnight floating rate
- In the above example
 Say Notional Amount : Rs.5 crores
 Benchmark : NSE MIBOR
 Tenor : 91 days
 Fixed Rate : 6.25% At the end of 91 days
 The Scheme Pays : compounded call rates for 91 days, which averages to say 5.90%

The Scheme receives fixed rate at 6.25% for 91 days.

At the end of 91 days the transaction will be settled as under:-

DWS Fund receive Fixed rate @ 6.25% for 91 days	Rs. 7,79,110
DWS Fund pays floating rate @5.90% for 91 days amounting to	Rs. 7,35,479
Net Receivable /Settlement Value	Rs. 43,631

Alternatively, usage of swap could result in a loss.

In the above example, let us assume that the Call Rate moves to 6.50%, as short term liquidity in the system hardens unexpectedly. In such a scenario, the nature of payments to be made and to be received by the Scheme would be as under:

The Scheme pays compounded Call rates for 91 days, which averages 6.50% while it receives a fixed rate payment at 6.25% for 91 days.

At the end of 91 days the transaction will be settled as under:-

DWS Fund receives Fixed rate @ 6.25% for 91 days	Rs. 7,79,110
DWS Fund pays floating rate @ 6.50 % for 91 days	Rs. 810,274
Net Receivable /Settlement Value	Loss of Rs. 31,164

Please note that the above example is hypothetical in nature and the figures are assumed.

The fixed Income derivatives market has made considerable progress in last two years. Interest rate swaps have become an integral part of Risk Management practice for most banks. Corporate Treasury have issued Innovative instruments like floating rate debt and constant maturity swaps.

This innovation on issuance, trading, settlement and risk management side will considerably enhance the depth and the width of the Indian debt markets and bring it at par with developed markets.

The Scheme may use derivative instruments primarily to protect the value of portfolio against potential risks such as interest rate risk, credit risks, reinvestment risk and liquidity risks. This protection is also known as hedge. At the same time, however, a properly correlated hedge will result in a gain in the portfolio position being offset by a loss in the hedge position. As a result, the use of derivatives could limit any potential gain from an increase in value of the position hedged. In addition, an exposure to derivatives in excess of the hedging requirement can lead to losses. IRS and FRAs do also

have inherent credit and settlement risks. However, these risks are substantially reduced as they are limited to the interest streams and not the notional principal amounts.

Derivative instruments offer unique advantages like security exposures without the attendant execution and settlement risk. Derivative instruments carry a high risk return ratio. It is like an insurance policy where one has to pay the premium up-front and the benefit is contingent upon an event. Derivative instrument if used on a leveraged basis could distort the risk return ratio considerably even with a small price movement (the Scheme will not take a leveraged exposure). It requires a high level of knowledge, understanding and surveillance to control risk.

The Indian market for derivative instruments is still evolving.

The Scheme, however, will use the derivative instruments very judiciously and keep in mind the overall objective the Scheme.

Interest Rate Futures ("IRF")

IRF means a standardized interest rate derivative contract traded on a recognized stock exchange to buy or sell a notional security or any other interest bearing instrument or an index of such instruments or interest rates at a specified future date, at a price determined at the time of the contract.

Example of an IRF Contract Specification:

A 10 year IRF Contract will be having the following specifications:

- Underlying - 10 year coupon bearing Government of India Security
- Contract Size – Rs 2,00,000
- Available Contracts - Monthly Contract with maximum maturity of 3 months
- Tenor - The maximum maturity of the contract is 3 months
- Expiry Day - Last thursday of the expiry month
- Trading Hours - 9.00 a.m. to 5.00 p.m.
- Limits have been placed on gross open positions of clients across all contracts at 3% of the total open interest or Rs. 200 crores, whichever is higher.
- Quotations - Similar to the price of a GoI security, having a day count convention of 30/360.

IRF for Hedging:

Interest rate futures can also be used for hedging purpose as follows:

- Hedging for increase in interest rates: In this case a decrease in the value of the portfolio can be hedged by taking a short position. If interest rates do increase, the portfolio value will decrease but the value of the futures will increase.
- Changing duration of bond portfolio: Broadly, futures can be purchased to increase the duration of the portfolio or sold to decrease the duration of the portfolio.

Example -

A debt mutual fund can effectively use IRFs to hedge from increase in interest rates. The fund has to short IRFs to hedge its position.

Amount Invested in 9.125% 10 Yr G-Sec	54,00,000.00
View	Yields likely to go up in next one month
Current Yield from Bonds	9.125%
Price	100.00
No. of bonds held	54,000.00
March Futures Price	92.0500
Settlement Date	1st February, 2015
Futures expiry	26th March, 2015
Yield on futures	8.18%

No. of contracts purchased	27.00
After 1 month	
Yield on Bonds	9.852%
Price	95.4489
Loss on Bond	-2.45,759.00
Futures yield after 1 month	8.87%
Futures Price	87.8225
Profit on futures contract	2,28,245.00
Net Gain I (Loss)	-17,474.00

Note: The hedge needs to be monitored regularly to make it more effective and the hedge ratio needs to be applied to determine the number of futures contracts required to hedge the cash bond position.

A mutual fund can also hedge its corporate bond portfolio by using IRFs. However this will be a cross hedge and may not be as effective as hedging a government bond portfolio.

Investment in Interest Rate Futures (IRF) will be counted as exposure unless it is a perfect hedge (i.e. have the same security).

F. INVESTMENT STRATEGY

The Fund Management team endeavors to meet the investment objective whilst maintaining a balance between safety and return on investments. Since the Scheme is a close ended scheme with a defined maturity, the fund manager would invest in securities maturing within the maturity period of the Scheme. The Scheme shall be actively managed and the Fund Management team may endeavor to generate returns whilst moderating credit and interest rate risk. The Fund Manager shall formulate a view of the interest rate movement based on various parameters of the Indian economy, as well as developments in global markets. The Investment Manager may try to leverage its international resource base to understand the global economic and interest rate environment. Deutsche Asset Management (DeAM) has a proprietary research platform, accessed by DeAM investment professionals across the globe. Research inputs along with discussions with colleagues across the globe on the global economic environment provide the fund management team with a global perspective.

Investment views/decisions inter alia may be taken on the basis of the following parameters:

- Returns offered relative to alternative investment opportunities.
- Prevailing interest rate scenario
- Quality of the security/instrument (including the financial health of the issuer)
- Maturity profile of the instrument
- Any other factors considered relevant in the opinion of the Fund Management team.

The Scheme may also use derivatives to reduce the volatility of the portfolio and/or to enhance the portfolio returns. The Scheme may try to identify securities that yield relative value over others for similar risk and liquidity level. Various analytical tools like yield curve analysis, spreads between asset classes, horizon returns, forward implied interest rates, may be deployed to evaluate various investment options.

The Scheme may try to identify securities that yield relative value over others for similar risk and liquidity level. Various analytical tools like yield curve analysis, spreads between asset classes, horizon returns, forward implied interest rates, may be deployed to evaluate various investment options.

Investments in debt instruments carry various risks like interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst these cannot be done away with, they may be minimized by diversification and effective use of hedging techniques.

Risk Control

Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.

The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. Stock specific risk will be minimized by investing only in those companies that have been analyzed by the Investment Team at the AMC. For investments in debt securities, the AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous and in-depth credit evaluation of the securities proposed to be invested in, will be carried out by the investment team of the AMC. Rated Debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC will be guided but not limited by the ratings of Rating Agencies such as CRISIL, CARE, ICRA and Duff and Fitch or any other rating agencies that may be registered with SEBI from time to time.

Procedure and Recording of Investment Decisions:

- The Fund Manager for the Scheme is responsible for making buy / sell decisions in respect of the securities in the respective Schemes' portfolios. The investment decisions are made on a daily basis keeping in view the market conditions and all relevant aspects.
- The Board of the AMC has constituted an Investment Review Committee that will meet at periodic intervals. The Investment Review Committee, at its meetings, will review all investments made by the Scheme. The Investment review committee will consist of Chief Executive Officer, Chief Operating Officer, Chief Investment Officer, Head - Fixed Income/Fund Manager, Head-Domestic Equity, Compliance Officer & Company Secretary. The Board of the AMC may add more members to the committee as and when required
- The Investment Review Committee will also review the performance of the Scheme(s) and general market outlook and assess the investment pattern of the Scheme with regard to parameters and directions laid down in the Key Operating Procedure for Equity and Fixed Income.
- It is the responsibility of the AMC to ensure that the investments are made as per the internal / Regulatory guidelines, Scheme investment objectives and in the interest of the Unitholders of the respective Scheme(s).
- The CEO/ CIO/Fund Manager will make presentations to the Board of the AMC and the Trustees periodically, indicating the performance of the Scheme(s). Among other things, the Board of AMC and Trustee will review the performance of the Scheme in comparison to the benchmark. The Trustees reserve the right to change the benchmark for evaluation of performance of the Scheme from time to time in conformity with the Investment objectives and appropriateness of the benchmark subject to SEBI Regulations, and other prevailing guidelines, if any.
- The CEO/ CIO/ Fund Manager will bring to the notice of the AMC Board, specific factors if any, which are impacting the performance of any individual Scheme. The Board on consideration of all relevant factors may, if necessary, give appropriate directions to the AMC. Similarly, the performance of the Scheme(s) will be submitted to the Trustees. CEO/CIO/ Fund Manager will explain to the Trustees, the details on the Schemes' performance vis-à-vis the benchmark returns. The Trustees and the AMC board may also review the performance of the Schemes in the light of performance of the mutual funds industry as published from time to time by independent research agencies and financial newspapers and journals and may take corrective action in case of unsatisfactory performance.
- All investment decisions shall be recorded in terms of SEBI Circular no MFD/CIR/6/73/2000 dated July 27, 2000 or as may

be revised by SEBI from time to time. Scheme. Such changes in the investment pattern will be for short term and defensive considerations.

G. FUNDAMENTAL ATTRIBUTES

Following are the Fundamental Attributes of the Scheme, in terms of Regulation 18 (15A) of the SEBI (MF) Regulations:

(i) Type of a Scheme

- Close ended debt fund

(ii) Investment Objective

- Main Objective - The objective of the Scheme is to generate income by investing in debt and money market instruments maturing on or before the date of the maturity of the Scheme. There can be no assurance that the investment objective of the Scheme will be realized.
- Investment pattern - The tentative Debt/Money Market portfolio break-up with minimum and maximum asset allocation, while retaining the option to alter the asset allocation for a short term period on defensive considerations.

(iii) Terms of Issue

- Liquidity provisions such as listing, repurchase, redemption:- As mentioned in summary of the Scheme, Section III A and Section III B of this SID
- Aggregate fees and expenses charged to the Scheme. As mentioned under Chapter IV – B para.
- Any safety net or guarantee provided : This Scheme does not provide any guaranteed or assured return to its Investors

In accordance with Regulation 18(15A) of the SEBI (MF) Regulations, the Trustees shall ensure that no change in the fundamental attributes of the Scheme(s) and Option(s) there under or the trust or fee and expenses payable or any other change which would modify the Scheme(s) and the Option(s) there under and affect the interests of Unit holders is carried out unless:

- a) A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
- b) The Unitholders are given an option for a period of 30 days to exit at the prevailing Net Asset Value without any exit load.

H. BENCHMARK

The Benchmark index of the Scheme is CRISIL Composite Bond Fund Index

CRISIL Composite Bond Fund Index shall be the benchmark for the Scheme. The CRISIL Composite Bond Fund Index tracks the performance of the constituents like the Call Index, the CP Index, the AAA Index, AA Index and the Gilt Fund Index to arrive at the index figure.

The Scheme intends to invest in most of these instruments. Therefore, CRISIL Composite Bond Fund Index is a convenient, appropriate and easily available tool for analysis and capture of market movements and for determining the corresponding effect on a portfolio consisting of the above-mentioned instruments.

Among other things, the Board of AMC and Trustee will review the performance of the Scheme in comparison to the benchmark. The Trustees reserve the right to change the benchmark for evaluation of performance of the Scheme from time to time in conformity with the Investment objectives and appropriateness of the benchmark subject to SEBI Regulations, and other prevailing guidelines, if any.

Taxation

The information is provided for general information only. However, in view of the individual nature of the implications, each investor is advised to consult his or her own tax advisors/authorised dealers with respect to the specific amount of tax and other implications arising out of his or her participation in the Schemes.

Applicable tax rates based on prevailing tax laws

	Unit holder		Mutual Fund
	Resident	FII/FPIs	
Tax on Dividend	NIL	NIL	<p>Dividend Distribution Tax (DDT) on the dividend distributed under this scheme:</p> <p>Individual & HUF 28.84% (i.e. 25% plus 12% surcharge plus 3% education cess)</p> <p>Other than Individual & HUF 34.6080% (30% plus 12% surcharge plus 3% education cess)</p>

Capital Gains*

Short Term Capital Gain	Individual/HUF/AOP/BOI – Taxable as per the applicable slab rates** Companies/Firms – 30% **	30% **	NIL
Long Term Capital Gain	20%** with indexation	10% **	NIL

* This chart is prepared on assumption that the investment in units of Mutual Fund would be characterized as capital asset in the hands of the unit holder.

Capital gains arising on transfer or redemption of units other than equity oriented units shall be regarded as 'long-term capital gains' if such units are held for a period of more than 36 months.

** The above rates would be increased by a surcharge of :

Type of Investor	Taxable income > 10 Million INR, but < 100 Million INR	Taxable income > 100 Million INR
a) Domestic Company	7%	12%
b) Individual/HUF/BOI/Firm	12%	12%
FII / FPI		
a) Corporate	2%	5%
b) Other than corporate	12%	12%

Further, an additional surcharge of 3% (Education cess of 2% and Secondary & Higher education Cess of 1%) would be charged on the amount of tax inclusive of surcharge as applicable, for all unit holders.

Note:

- Under section 196D of the Income-tax Act, 1961, capital gains arising to FII from transfer of securities is not subject to withholding tax.
- Under section 10(23D) of the Income-tax Act, 1961, income earned by a Mutual Fund registered with SEBI is exempt from income tax.
- Where the fund receives any income from investments made in overseas jurisdiction, the same may be subject to withholding tax (or any other tax) in the relevant jurisdiction from which the income is received.
- As the income of the mutual fund is exempt from tax in India, credit / refund in respect of such foreign taxes may not be available in India.
- Since, this Scheme does not qualify as an equity oriented fund, no Securities Transaction tax is payable by the unit holders on redemption / repurchase of units by the Fund.

For further details on taxation please refer to the clause on taxation in the SAI.

D. COMPUTATION OF NAV

NAV of Units under the Scheme shall be calculated as shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments (+) Current Assets (-) Current Liabilities and Provisions}}{\text{No. of Units outstanding under Scheme}}$$

The NAV of the Schemes will be calculated up to 4 decimal places and published in atleast 2 daily newspapers with national circulation. Also, the NAV will be declared on every business day on the AMFI website www.amfiindia.com and the Fund's website www.dws-india.com by 9. p.m on the same day. The valuation of the Scheme' assets and calculation of the Scheme' NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

IV. Fees and Expenses

A. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. The entire new fund offer expense of the said scheme shall be borne by the AMC.

B. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the Scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated that the following % per annum of the daily net assets of the Scheme will be charged to the Scheme as recurring expenses. For the actual current expenses being charged, the investor should refer to the website of the mutual fund.

Expense Head/ Nature of Expense	% of daily Net Assets Per Annum
Investment Management and Advisory Fees	Upto 2.25%
Trustee fee	
Audit fees	
Custodian fees	
RTA Fees	
Marketing & Selling expense incl. agent commission	
Cost related to investor communications	
Cost of fund transfer from location to location	
Cost of providing account statements and dividend redemption cheques and warrants	
Costs of statutory Advertisements	
Cost towards investor education & awareness (at least 2 bps)	
Brokerage & transaction cost over and above 12 bps and 5 bps for cash and derivative market trades resp.	
Service tax on expenses other than investment and advisory fees	
Service tax on brokerage and transaction cost	
Other Expenses (including listing expenses)*	
Maximum total expense ratio (TER) permissible under Regulation 52 (6) (c) (i) and (6) (a)	Upto 2.25%
Additional expenses for gross new inflows from specified cities i.e. beyond top 15 cities	Upto 0.30%

* As permitted under the Regulation 52 of SEBI (Mutual Funds) Regulations, 1996

Direct Option shall have a lower expense ratio excluding distribution expenses, commission, etc and no commission for distribution of Units will be paid / charged under Direct Option. Commission/ Distribution expenses will not be charged in case of Direct Option.

At least 20% of the TER is charged towards distribution expenses/ commission in the Regular Option. The TER of the Direct Option will be lower to the extent of the abovementioned distribution expenses/ commission (at least 20%) which is charged in the Regular Option. E.g. If the TER charged in the Regular Option is 0.25 % (25 basis points) of the daily net assets then the TER charged in the Direct Option shall not exceed 0.20% (20 basis points) of the daily net assets".

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se within the overall limit of Total Running Expenses permitted by the SEBI (MF) Regulations.

The total recurring expenses which may be charged to the respective Option (s) are explained below:

Recurring expenses under Regulation 52 (6):

On the first Rs. 100 crores of the daily net assets - 2.25% p.a.

On the next Rs. 300 crores of the daily net assets - 2.00% p.a.

On the next Rs. 300 crores of the daily net assets - 1.75% p.a.

On the balance of the assets - 1.50% p.a.

Further, as per regulation 52 (6A) of SEBI (Mutual Funds) Regulations, 1996, the AMC may charge the following to the Scheme:

- Additional TER up to 30 basis points will be charged on daily net assets of the scheme, if the new inflows from beyond top 15 cities are at least (a) 30% of gross new inflows in the scheme or (b) 15% of the average assets under management (year to date) of the scheme, whichever is higher.

In case inflows from beyond top 15 cities is less than the higher of (a) or (b) above, additional TER on daily net assets of the scheme shall be charged on a proportionate basis as per the formula prescribed by SEBI.

The expenses charged under this clause should be utilized for distribution expenses incurred for bringing inflows from beyond top 15 cities. The amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

- Brokerage and transaction costs which are incurred for the purpose of execution of trade and is included in the cost of investment, not exceeding 0.12 per cent in case of cash market transactions and 0.05 per cent in case of derivative market transactions.

AMC may charge service tax on investment and advisory fees of the scheme in addition to the maximum limit of TER as per the Regulation 52(6) and (6A).

AMC may charge service tax on expenses other than investment and advisory fees of the scheme, if any within the maximum limit of TER as per the Regulation under 52(6) and (6A).

Service tax on brokerage and transaction cost paid for asset purchases, will be within the limit prescribed under regulation 52 of the Regulations.

As per SEBI Circular dated November 19, 2012 having reference number CIR/IMD/24/2012, it is clarified that the brokerage and transaction cost incurred for the purpose of execution of trade may be capitalized to the extent of 0.12 percent and 0.05 percent for cash market transactions and derivatives transactions respectively. Any payment towards brokerage and transaction cost, over and above the said 12 bps and 5bps for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52 of the SEBI (MF) Regulations. Any expenditure in excess of the said prescribed limit (including brokerage and transaction cost, if any) shall be borne by the AMC or by the trustee or sponsors.

C. LOAD STRUCTURE

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the Scheme. Load amounts are variable and are subject to change from time to time.
